

Smart Thermostat

RDS120, RDS120.B

Advanced cloud connected thermostat for applications in light commercial and residential buildings.

- Controls conventional HVAC systems up to 3H/2C and heat pumps up to 4H/2C
- Easy to read, backlit, auto-dimming 3.5" color LCD touch
- Intuitive remote user control using Apple iOS and Android mobile phone applications
- One-touch green leaf button to maximize energy efficiency
- Built-in Volatile Organic Compounds (VOC) sensor enables ventilation strategies for optimum indoor air quality
- Built-in humidity sensor
- Built-in occupancy sensor enables smart occupancy control
- Full, easy to program user schedule

Thermostat Highlights

- Built-in VOC sensor senses wide range of offending organic odors that contribute to stale air and drives ventilation control
- Easy to understand tri-level air quality indication: **Good, Okay, Poor**
- Built-in temperature and humidity sensors
- Inputs for remote or averaging temperature and humidity sensors
- One-touch operation for **Away, Off, Fan** and **Heating/Cooling**
- Configurable setpoint limits
- Password protected screen lock
- Presence detection using a built-in sensor
- PID algorithm for precise control
- Advanced energy saving control with free cooling capability
- Two multifunctional inputs, optional and configurable for:
 - Room temperature
 - Operating mode switch
 - Universal contact
 - Outside air temperature
 - Room air humidity
 - Presence detector
 - Condensation monitor
 - Room air quality
- Six relay outputs for:
 - Conventional systems up to 3H/2C
 - Heat pumps with up to 2 compressors and 2 stages of auxiliary heat
 - Humidity or ventilation control
- Guided Setup Wizard
- Over the air (OTA) firmware upgradable
- Green Leaf button engages occupants in maximizing system efficiency. If scheduled setpoint is overridden, the green leaf will turn red. One touch will return the system to the programmed setpoint and the leaf will return to green.

Mobile App Features

- Support iOS and Android smartphones
- Support **Dark** and **Light** background colors on mobile app
- Full 7-day programmable schedule with three modes:
 - **Comfort**: comfort settings during occupied periods
 - **Economy**: setting for transition between **Unoccupied** and **Comfort**
 - **Unoccupied**: setting for periods during absence to maximize energy savings
- Duplicates thermostat HMI on smartphone screen
- User account management
- Monitor temperature and humidity
- Monitor indoor air quality: **Good, Okay, Poor**
- Data security with Siemens Cloud Computing Platform

Application

The RDS120/RDS120.B is designed to control Heat Pump or Conventional HVAC heating and cooling applications. It can control up to three stages of heating and two stages of cooling in conventional systems and up to two compressors and two stages of auxiliary heat in heat pump systems. Using its fan, the RDS120/RDS120.B can also (de)humidify a space.

Note: The RDS120/RDS120.B is a room thermostat, and as such, there are limitations to what it can control. Caution should be used when considering the RDS120/RDS120.B for very large spaces that fit hundreds of people. Spaces like these will use multiple primary equipment pieces (e.g. multiple roof top units), which require a coordinated control. Especially humidity control of such a space will require a sophisticated application, covering for example temperature control of the supply air, modulated fan speed, and considering outside air temperature and humidity. The RDS120/RDS120.B does none of this, offering a simple (de)humidification control logic, based on humidity set point and fixed fan speed only.

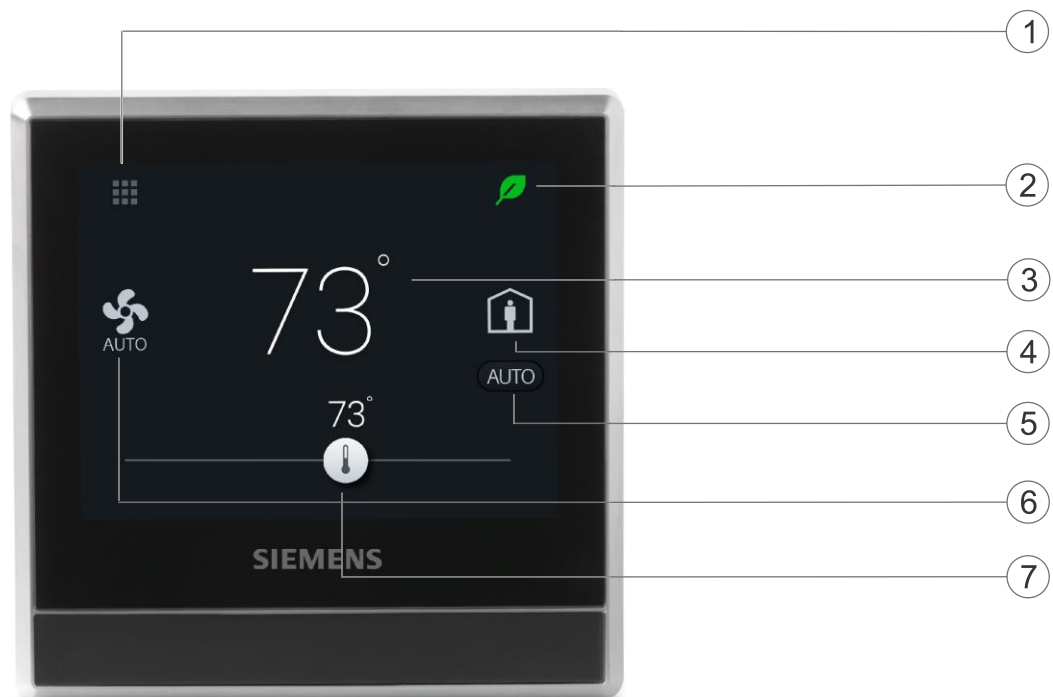

Mechanical Design

The room thermostat consists of the following parts:

- Front housing with touch screen and sensors
- Back housing with terminals and relays
- Mounting hardware for installation on 2"×4" electrical box or directly on drywall

Operation and Settings

Active Display

1	System setup screens and detailed information display
2	Shows if the system is working in an energy-optimized mode. If the leaf is red, some predefined settings have been changed. One touch to the leaf returns settings to configured settings and reverts leaf color to green.
3	Room temperature
4	Manually select between At home and Away

5	Shows if the thermostat is operating per the schedule (AUTO) or manually (MANUAL). Please note: <ul style="list-style-type: none"> • If there is Cloud connection and the scheduler has been programmed, the thermostat will follow it. Any temporary change of the temperature setpoint is effective only during the currently scheduled mode. • If there is Cloud connection, but the schedule has not been programmed, the thermostat follows the default schedule. • If there is no Cloud connection, the thermostat will have no schedule and will be operated manually.
6	Fan mode (AUTO/ON)
7	Temperature setpoint slider. Icon color changes as setpoint is changed: <ul style="list-style-type: none"> • Slider changes to red when heating relay is energized. • Slider changes to blue when cooling relay is energized. • If system has reached setpoint and is idle, the slider color stays white.

Idle Display

1	Relative humidity
2	Shows room air quality: <ul style="list-style-type: none"> • Green = Very Good • Orange = Fair • Red = Poor
3	Shows if the system is working in an energy-optimized mode. If the leaf is red, some pre-defined settings have been changed. One touch to the leaf returns settings to configured settings and reverts leaf color to green.
4	Room temperature

NOTE: Idle mode display will vary based on system configuration.

Notes

Security

 CAUTION	
	<p>National safety regulations</p> <p>Failure to comply with applicable safety regulations may result in personal injury and property damage</p> <ul style="list-style-type: none"> Observe and comply with the appropriate safety regulations.

Engineering

See Product Documentation [[▶ 7](#)] for information on engineering, selection and sizing connecting cables for supply voltage and field devices.

Installation Location

- The devices are suitable for wall installation.
- Recommended height: 5 feet above the floor.
- Do not install the devices in recesses, shelves, behind curtains or doors, or above or near heat sources.
- Avoid direct exposure to sun and drafts.
- Seal the conduit or backwall as drafts can affect sensor readings.
- Observe maximum ambient conditions.

Wiring

Use only class 2 rated power source with proper current limiting.

Installation

Thermostat may be mounted directly on wall using drywall anchors and screws (included). For installation on a 2" x 4" conduit box, use the appropriate mounting plate and plastic trim piece (included).

⚠ WARNING

No user serviceable parts inside.

Risk of fire and injury due to short-circuits

- Use properly sized wires for connections

Commissioning

Refer to the Quick guide and User guide (see Product Documentation [▶ 7]) to configure your device. Commissioning includes the following:

- Internet connection
- Application setup
- Account registration and device pairing

NOTE: Before configuring your thermostat, make sure you have Internet connection, a valid email address, and a smartphone.

Operation

Operating System

OS	OS version	App Store
iOS	iOS 12 or above	App store®
Android	Android™ 10.0 or above	Google Play™

Maintenance

The thermostat is designed for maintenance-free operation.

Disposal

The device is considered an electronic device for disposal in accordance with European Directive and may not be disposed of as domestic waste.

- Use only designated channels for disposing the devices.
- Comply with all local and currently applicable laws and regulations.

Regulatory information

Radio equipment directive

The equipment is using harmonized frequency in Europe and complies with the Radio Equipment Directive (2014/53/EU, formerly 1999/5/EC).

ISED Regulations (Canada)

This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) this device may not cause interference,

and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio

exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne

doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

⚠ WARNING

Modification of this device to receive cellular radio telephone service signals is prohibited under FCC rules and federal law.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20cm between the radiator & your body.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

M	Common for X1/X2 inputs

Wiring Diagrams

Note:

- For US installations use Class 2 rated power source. For other installations, use current protection with current rated at max. 4 A.
- If a single transformer is used, keep jumper RH-RC in place. Connect AC 24 V to the RC terminal, and neutral to terminal C. If separate transformers are used for heating and cooling systems, remove jumper RH-RC. Connect cooling AC 24 V to terminal RC, neutral to terminal C and heating AC 24 V to terminal RH.
